

FOCUS VARIATION: Advanced Optical 3D Technique for Innovative Surface Measurement

Our team is thrilled to invite you to our upcoming seminar in JB focusing on the cutting-edge technology from Bruker Alicona. In this insightful session, we will focus on the latest advancements in optical 3D metrology and explore how it can enhance your inspection capabilities.

Connect with our team and get the chance to have a 1-on-1 discussion with our speaker from Bruker Alicona.

Date	Wednesday, 12 June 2024
Time	09:30 AM – 12:30 PM. (Registration begins at 09:30 AM)
Venue	19 Jalan Ekoperniagaan 2/8 Taman Ekoperniagaan 81100 Johor Bahru, Johor, Malaysia Location Map
Our speaker	 Dominik Urlep Regional Sales Manager, APAC Bruker Alicona
Topics	Exploring the Versatility of Optical 3D Metrology Across Industries: A Deep Dive into Unique Measurement Strategies
Why Should You Attend	
<ul style="list-style-type: none"> • Explore FocusX - the most versatile and fastest optical 3D measuring device in its class. • Understand the principles and applications of Optical 3D Metrology for high-precision 3D measurement data acquisition. • Gain real-world insights showcasing the benefits of non-destructive testing in various industries and applications. 	
Free Registration. <u>To Reserve:</u> RSVP here or send us an email at sales@cairnhill.com . First come, first served.	
Lunch and refreshments provided	
You may also approach our speakers for a one-to-one private discussion
